LANGUAGES

Arabic	Native
English	C1 Advanced
Italian	Elementary

TECHNICAL SKILLS

Programming

Python, C, C++, Java, JavaScript, HTML/CSS, PHP, SQL

Frameworks

React, React Native, Flutter, Node.js, Electron

Databases & Cloud

Supabase, Firebase, MySQL

Tools & Platforms

VS Code, Webflow, Shopify, Framer

AI & Media

Prompt Engineering, OBS Studio, PRISM Live Studio, Adobe Creative Suite, CapCut, Premiere Pro

SUMMARY

Dedicated Artificial Intelligence student at the Arab Academy for Science, Technology & Maritime Transport (AASTMT), with a proven record of turning theoretical knowledge into practical, shipped products. Experienced across full-stack web and mobile development, AI-driven platforms, and software quality assurance, with several founded ventures already live. Seeking to apply strong skills in algorithm design, backend integration, and data analysis to impactful engineering teams.

EDUCATION

B.Sc. in Computing and Information Technology — AI Specialization 2024 – 2028

Arab Academy for Science, Technology & Maritime Transport (AASTMT)

PROFESSIONAL EXPERIENCE

Freelance Software Developer & QA Tester 2024 – Present

uTest, Test IO, Turing, Braintrust, Upwork

- Executed complex software testing cycles, identified bugs, and submitted detailed reports for web and mobile applications (e.g., uTest Academy).
- Developed custom software solutions, landing pages, and automated workflows for freelance clients.
- Trained AI models and annotated data for platforms including Appen, Mindrift, and CrowdGen.

Content Creator & Video Editor 2023 – Present

YouTube & Twitch ("silentalgo")

- Managed a gaming and educational channel focused on high-quality walkthroughs and tactical gameplay.
- Used AI tools, OBS Studio, and video editing software for production, live-stream optimization, and digital asset creation.

Customer Service Trainee Feb 2026

Intelcia

- Completed intensive professional training in communication, complex problem-solving, and CRM systems.

KEY PROJECTS

▸ **Streetlore App — Lead Developer**

- Travel-exploration mobile app with interactive mapping — Flutter (frontend) & Supabase (auth/database).

▸ **AetherCode AI — Founder & Developer**

- AI-powered SaaS platform for workflow automation, code generation, and autonomous AI agents.

▸ **App Easy**

- Full-stack desktop SaaS (React, Electron, Supabase) to schedule and distribute social media content.

▸ **Ateeq Streetwear Store — Co-founder**

- Digital identity and e-commerce platform for an Alexandria-based streetwear brand — storefront to product mockups.

▸ **SabaePDF — Founder & Developer**

- A web tool specializing in managing and editing PDF files.

▸ **Cybersecurity Lab — Vulnerability Exploitation**

- Analyzed and exploited the vsFTPd 2.3.4 backdoor using Nmap, Searchsploit, and Metasploit in an isolated lab.

▸ **Engz Web**

- Formulated the product architecture, UI wireframes, and landing page designs for a freelance SaaS web utility.
- Designed comprehensive database schemas and project roadmaps to ensure a scalable and efficient user experience.

▸ **Additional Web Tools**

- QuickCV, ClinicEase, and Waratha Universe.

▸ **Facebook Automation Script**

- Developed a custom automation tool to streamline Facebook interactions, content posting, and repetitive tasks efficiently.

▸ **Twitter (X) Automation Script**

- Engineered a dedicated script for Twitter to automate workflows, manage scheduled posts, and enhance digital presence without manual intervention.

VOLUNTEER & LEADERSHIP

Operations Team Member

ECPC 2025, ACPC 2024, Arab Championship 2025, UIPM Modern Pentathlon World Championships 2025

- Managed logistics coordination, delegate reception, and comprehensive team support for international contestants.
